

FOX 40 GRIPPGUARD MOUTHGUARD

Certificate of Limited Warranty

FITTING PROCEDURE

- Before beginning the fitting procedure, wash the Fox 40 GrippGuard mouthguard with mild soap and dry thoroughly. Position it in the user's mouth, allowing them to bite down gently. This will ensure that it is a reasonable fit while allowing them to get used to the mouthguard.
- Carefully pour hot water into a mug. Place the Fox 40 GrippGuard mouthguard in the hot water for 30 seconds keeping the tether out of the water. Then, immediately place the mouthguard in cold water for one second.
- Quickly position the warm mouthguard in the user's mouth assuring that the tether loop is centered under the user's nose. Then have the user bite down gently. Using your fingers, press the outside of the mouthguard against the gums, starting at the front and working toward the back molars. Next, using your thumbs, press the mouthguard toward the roof of the mouth inside the teeth. Since the mouthguard is now setting, this must be done within ten seconds.
- The user should now bite down firmly. Keep the mouthguard in the mouth until it cools.

BEFORE YOU BEGIN, YOU'LL NEED

- Pot or kettle to boil water. (If using a microwave, stir water after boiling to avoid superheating)
- A mug for boiling water
- Another mug for cold water
